

4 REAL WAYS TO MAKE MONEY WITH SOCIAL MEDIA

Introduction

Hello and thank you for downloading this money-making guide. First, I want to apologize for my English. It is my second language and there might be mistakes in the way this PDF is written. The most important thing is for you to understand the information inside and I believe you will. Below you will find 4 real ways to make money with social media with detailed explanation on exactly how to make them work. The basic idea of those methods is building an audience and then promoting dating sites to that audience. It is not hard work but it will take some of your time. It depends entirely on you. If you put some time, you will get some results. If you put greater amount of time in this, you will get greater results. Think of those methods as your own online business, because they are. You have to do all it takes for your business to succeed, so if you are not serious and you don't want to have your own online business, you don't need the information in this PDF. It takes hard work and determination to succeed in every business and this one is not different. Don't lose hope if it doesn't work right from day 2, just keep doing it and you will surely succeed. Never give up! Never surrender to negativity and doubts. Don't give up, be absolutely sure you will succeed, and you will! You can make thousands of dollars every month with those methods, thousands of other people are doing it, so can you. You can pick a method from those below or do all of them. It's up to you. Your time and determination. I wish you good luck and fast results in applying those methods.

The Facebook Account Method.

1. Get a female Facebook account.

For this method, you will need a Facebook account of an attractive girl. If you have a suitable account to use go ahead and change it according to the tips below.

If you don't have a suitable account. you can either create a new one or purchase one from BuyAccs.com (it will cost less than a dollar, but you need a PayPal account to pay with). If you create a new account, make sure you follow all the below tips:

- Create a new email account for your new Facebook account. Do not use an email account that you used for another Facebook account (even if you have already removed it from the previous account).
- If you have used more than 5 Facebook accounts from your personal computer, it is recommended to use a Proxy. You can use a free service such as HideMyAss.

- Create a female Facebook account with profile information that looks real. You can use: [FakeNameGenerator](#) if you don't feel like making it all up :)
- Make sure you use photos of a very attractive girl. Include at least 10 photos in the account and set up a cover photo as well. You can use provocative photos but you should never post nude photos on Facebook.
- Make sure you choose a good profile picture. Think about how the thumbnail will look like. Best type of photo you can choose is a portrait of the girl's face.
- Set up as much profile information as possible. This makes the account look real and it's very important for gathering friends and/or followers.
- Enable followers in the account settings page.
- Verify your Facebook account with phone. If you have used your phone number to verify your personal Facebook account, just login and remove the phone number from your account. You can now use the same number to verify another Facebook account.

2. Start gathering friends and followers.

This is the most important part of this method. As fast you can gain friends and followers, the more money you will make. That's a general rule.

There are a few ways of getting friends and followers listed below, however this is the point where you need to get creative. Think about other methods to obtain friends and followers to make the process as fast as possible.

Remember that Facebook has a 5000 friends limit, so choose carefully what requests to accept and what not to. We are going to be promoting dating sites, so you only need men.

Don't accept or send requests to/from women as they don't sign-up for dating sites as often as men and this will bring your earnings down. Those are the countries you should focus on:

- **United States**
- **Italy**
- **Denmark**
- **United Kingdom**
- **New Zealand**
- **Austria**
- **Canada**
- **South Africa**
- **Ireland**
- **Germany**
- **Spain**
- **Finland**
- **France**
- **Sweden**
- **Belgium**
- **Australia**
- **Norway**
- **Netherlands**
- **Switzerland**

Don't waste your time and friend slots for people from other countries than those above. You need to focus on this list, because those are the countries that will make you the most money.

Examples on how to get new friends and followers fast:

- If you have filled all the profile info like hometown, high-school, college and workplace, Facebook will start suggesting you friends right away. Start sending friend request to the men suggested to you by Facebook. In the beginning while your account is brand new, do not send more than 20-30 friend requests because you risk getting your account blocked.
- Join groups and be active on them. Post comments and wall posts in groups, such as introducing yourself and inviting men to send you friend requests. Try to find groups with mostly men member base (such as groups for cars, construction, football and other stuff that are more famous for men than women).
- Find and like fan pages related to dating sites. All fan pages focusing on posting girl photos are suitable. Their audience is exactly what you need – men

interested in women. Like the posts of such fan pages in order to see their future posts in your news feed. Comment on their posts so their fans see you and send you friend requests. The more you do this, the more exposure you will get for your accounts.

- Use free dating sites. A lot of dating sites are free to join for female members. Just sign-up, create an account and put your Facebook profile link in the profile description section of the dating site.
- Use forums to gain friends and followers. Join various forums, post a few comments on threads you have something to say about and then add your profile link to your signature with a text inviting men to join you on Facebook.
- Use other social media accounts to promote your new Facebook account.

Again, this is extremely important part of the method. Be creative, think of other ways to increase or friends/followers base. It is the key to increasing your earnings.

3. Post a link and make money.

As we discussed in the beginning we will be promoting dating sites. However, there is a problem here. There are a lot of dating sites and they all have specific conditions for the registrations they are paying for, such as country, device type, age and others.

All these criteria determine the amount of money you are getting paid for each sign-up you will bring to the dating sites. So, to cover all the 19 countries listed in point 1 and all device types and ages, you will need a lot of dating sites.

Managing all of this can be a nightmare. Luckily there is a simple solution for this part of the method. As soon as you have 5000 Facebook friends or followers, you can apply for an account with the adult affiliate network [Franktrax](#).

After you get approved, you will receive a single link that covers all the countries from pt. 1 (plus around 20 more), all device types and all ages. You just have to post your link with a photo of a pretty girl and that's it!

You are making money! Everything is taken care of for you. Your personal link is dedicated to your account and comes with pre-installed landing page that leads visitors to the best converting (earning you the most money per visitor) dating site, according to their country and device type.

All you need to do is post your link. The system is doing all the heavy lifting for you in the background, making sure you will make the most out of what you have.

4. Advanced mode (Optional).

After you master the method with your first Facebook account and you are indeed making money with it, you will want to take things to the next level. This is where the advanced mode comes in.

It is basically multiplying the method with multiple Facebook accounts. Managing just one Facebook can take a lot of time, so for scaling up you will need software automation.

[MassPlanner](#) is such a software, that can automate all the tasks you will need to be performing with your new Facebook accounts. The software costs \$10 per month, but don't invest time and money into it right away.

Master the method first with one account so you can master it with multiple account later. If you start right away with multiple accounts, you will not know what you are doing.

You have to go through the method manually in order to know how to set it up for automation. If you are going to use more than 5 accounts, you will need proxies.

I can personally recommend [SquidProxies](#). I have been using them for 4 years now and I had no issues with them. Just let them know what you need proxies for upon purchase, so they can set you up with the best proxies for Facebook.

The Instagram Account Method.

1. Get a new Instagram account.

Again, you can choose to create a new one yourself or purchase one at [BuyAccs.com](#). Instagram is easier to setup because you just don't have many options. So basically, you just need to setup the name on the account.

You can choose either a female personal name (you will need to have a lot of photos of the same girl) or something more general as "Sexy Girls" or "Beautiful Women" or "Daily Hot Photos". This way you will be able to post any random photos you choose.

Update the profile photo and post at least 10 photos, so potential followers can get the idea of what updates they will receive from your account, if they started following you.

2. Start getting followers.

This is the most important part of this method as well. The speed of gaining followers is determining the amount of money you make. This is the part when you get creative.

I will show you two methods of gaining Instagram followers, however do not rely only on them. Think about other methods of gaining followers like: other social media, commenting on blogs, forums etc.

- **Follow for Follow.** This is the easiest method of gaining followers. You just need to find other accounts related to the same niche. Do a search for “sexy” or “hot” and you will surely find accounts posting sexy girls photos. Again, those are just suggestions that are mostly used, so be creative and think of a way of finding those right profiles with your own searches. When you find a suitable account, go to the “Followers” section and start following the followers of that account.

Up to 60% of those people will follow you back and will see all your updates in their home section. You can follow up to 800 people per day in the first two weeks of creating a new Instagram account and up to 1,000 people per day when the account is more established. Make sure you post at least twice per day in order to keep your fans engaged.

- **Buy Shoutouts.** This is another very easy and fast method of gaining followers. It is not free though. The basic idea is purchasing a post on another Instagram account (Shoutout).

There are lots and lots of Instagram accounts offering this service. They won't type it directly on their profiles, however they will put their emails there (in the bio section of the account). So, keep that in mind when looking for accounts like yours.

If you see an email address, that means the account owner is open to the idea of selling Shoutouts. Just send a quick email telling them that you are interested in purchasing a Shoutout and asking them for their price for the service. You can also use a Shoutout marketplace like [ShoutCart](#).

3. Make money with your Instagram account.

That's the easy part. After you reach 10,000 followers you will start getting a lot of followers just by posting photos. Those posts will get a lot of likes and comments so a lot of the followers of your followers will see them too.

As we discussed in the beginning we will be promoting dating sites. There are a lot of dating sites and they all have specific conditions for the registrations they are paying for, such as country, device type, age and others.

All these criteria determine the amount of money you are getting paid for each sign-up you will bring to the dating sites. So, to cover all the 19 countries listed in point 1 of the first method and all device types and ages, you will need a lot of dating sites. Luckily there is a simple solution for this part of the method.

As soon as you have 5000 Instagram followers, you can apply for an account with the adult affiliate network [Franktrax](#). After you get approved, you will receive a single link that covers all the countries from pt. 1 (plus around 20 more), all device types and all ages.

You just have to put your link in the Website field of your profile settings and when posting photos, direct your followers to the Bio section with a photo description like: “Downloaded from the site in my bio!” or “For more sexy photos go to the link in the bio” or “Wanna meet hot single women? Go to the link in my bio!” and that’s it!

You are making money! Everything is taken care of for you. Your personal link is dedicated to your account and comes with pre-installed landing page that leads visitors to the best converting (earning you the most money per visitor) dating site, according to their country and device type.

All you need to do is put your link in your bio and post photos with description directing your followers to your link. The [Franktrax](#) system is doing all the heavy lifting for you in the background, making sure you will make the most out of what you bring.

4. Advanced Mode (Optional).

As soon as you start making money with your first Instagram account, you will start thinking of scaling up. Again, the advanced mode is just doing the same thing with multiple accounts. Managing just one Instagram account can take a lot of time, so for scaling up you will need software automation. There are two pieces of software I can recommend you for automating everything you need to do for those methods:

- [InstaGress](#) is a web-based software than can automate all the tasks you need done. It is very easy to setup and you can get used to it very fast.
- [MassPlanner](#) is the other software I highly recommend, it costs \$10 per month, and you should get it when you have mastered the method manually first.
- [InstaMate](#). That's another very useful web-based software. It is designed to help you get Instagram followers fast. It will help you find hashtags related to your content and show you the trending ones. It can automate the process of gaining followers for you, but it will not post on Instagram for you, so you will still have to use another software for that, or post manually yourself.

For using more than 5 Instagram accounts, you will need to use proxies to protect your accounts from getting blocked or disabled. I can recommend [SquidProxies](#). I have been using them for 4 years now without any issues.

The Shoutout Method

That's probably the easiest way to start making money with social media right away. It is not free though. You will need to invest in order to earn. The only two things that you have to are:

- 1. Register for a free [Franktrax](#) account.**

After you get approved you will receive a link for you to promote.

2. Buy Shoutouts and send visitors to your link.

Just find suitable accounts for posting sexy girls photos and contact them by the email they have left in their bio sections. Let them know you are interested in purchasing Shoutouts with links in the bio (because you will need them to put your link in their bio section for the time of the promotion) and ask them for their price.

After you negotiate a deal with a Shoutout provider send him the photo of a sexy girl you want posted with the description you want it posted with. Remember it should be something directing people to the link in the bio section.

After a Shoutout is created you can check how many visitors you have received and how much you have earned in your [Franktrax](#) account. You can also use a Shoutout marketplace like [ShoutCart](#). There is a filter over there, for seeing only Shoutout providers who accept the link in the bio option.

The Referrer Method.

That's the easiest free method of making money with social media. The [Franktrax](#) network offers you another way of making money online, without doing all the social media work explained above.

They have a referral program that pays you 7% commission on what your referrals make! This means that if you bring just 10 people in who make \$1,500 a month (which is fairly low), you will make \$1,050 in commissions per month for doing nothing!

Imagine if you bring 100 people or more. It is indeed the easiest way to make money. You just have to tell others about those methods. You can give away this PDF to everyone you want.

Just make sure they signup through your personal referral link (you can find it in your [Franktrax](#) dashboard), so you get commissions for everybody you refer.

I hope you enjoy these methods and make a lot of money with them! If you have any questions, drop me a mail.
